

YOUNG DEFENCE SCIENTISTS PROGRAMME (YDSP)

I Want To Experience The Exciting World Of Defence R&D!

You found it! The YDSP is exactly what you need to get started. Enjoy in-depth and insightful research as you are guided and mentored by defence scientists and engineers. Be ready to open your eyes and mind to new knowledge and possibilities!

Tell Me More!

Certainly! There are two main programmes designed and organised by DSO. Here's what you need to know about them:

World of Science (WOS)

- An enriching 1-week programme where you will discover advanced topics ranging from physical sciences to infocomm technologies critical to Singapore's defence.
- Forget about boring lectures. It's all about being in the thick of action. Enjoy plenty of hands-on sessions that bring knowledge to life!
- You are never alone. Our science and engineering experts from DSO and partners will be your teachers, mentors and buddies throughout your enriching journey.

Research@YDSP

- Realise your fullest potential as you work on an intriguing defence-related project and make an impact by working on a real problem.
- Explore new grounds and push the boundaries of your project in a real laboratory environment.
- You will be mentored at every step of your journey by DSO's scientists and engineers.

Would It Be Too Hard For Me?

There is nothing to worry about. The programmes are carefully structured to assist you in becoming a young defence scientist. We take pride in the many interesting lectures and clinics conducted by our experienced scientists and engineers that will keep you engaged and enriched throughout.

Ready To Give This A Go!

If you are a Singapore citizen in year 4 or 5 of the Integrated Programme (IP), with strong interest in physics and mathematics, we are happy to hear from you!

Perfect. Sign Me Up Now.

Boot up your computer now and email us at outreach@dso.org.sg
We are as ready as you are!
